## LSP - Task-1

### Linux Kernel Architecture

**process scheduling** - manages process execution.  
Allocates cpu time efficiently  
and fairly

**Memory Management** - Handles RAM allocation virtual  
memory and paging

**File System** - organize and handle file storage  
and access.

**Network stack** - Facilitates network communication  
using standard protocol

**Device Driver** - Enables communication between  
the kernel and hardware  
devices.
