SDLC Task-1

Objective: Create a simple use-case diagram for a library management system.

A library management system is a software that helps manage the daily activities in a library like issuing books and managing members.

There are two main actors in this system.

- Librarian - manages book checkout
- Member - borrows and returns book

main use cases include:

- check out book - done by both librarian and member.
- Return book - performed by the member.
